Sterling ROBOTICS ACADEMY 2026-27 COHORTS

A self-balancing robot, built from bare parts in twelve weeks.

Most kids follow the instructions. Yours will understand why they work.

EVERY WEEK
A 30-minute one-on-one with a mentor

DELIVERED
The robot kit, shipped to your door

AT THE END
Demo day and a Sterling certificate

2	12	6–12	$600
Start dates, 15 Nov or 10 Jan	Sundays from a box of parts to a robot	Grades, admission by entry test	Robot kit and weekly mentor included

Taught by Swarit Bhardwaj, former robotics researcher at IIT Bombay.

Take the free entry test ›

or WhatsApp +1 754 279 2415

The course

Twelve Sundays. From a box of parts to a robot that stands on its own.

WHAT THEY LEARN

Arduino coding, sensors, motors, feedback control and control systems.

WK 01 **Why things fall**
A broom, a phone and their first code.

WK 02 **Build the robot**
Screw by screw, then switch it on.

WK 03 **First real code**
Teach it to decide: if this, then that.

WK 04 **Make it talk back**
See what it thinks. Fix broken code.

WK 05 **The robot's inner ear**
The tiny chip that feels every tilt.

WK 06 **Which way is up**
Jumpy readings into one true angle.

WK 07 **Wheels that obey**
Speed, direction and stopping, in code.

WK 08 **How drones stay steady**
The big idea, and a first wobbly stand.

WK 09 **Standing tall**
It finds its balance and stands alone.

WK 10 **Bounce back**
Tuned until it survives a push.

WK 11 **Finish line**
A working robot, explained line by line.

WK 12 **Demo day**
Show the family what they built.

How it works

One live class. One mentor in your child's corner.

1:1

EVERY SINGLE WEEK

30 minutes, one on one. Swarit teaches every live class. Each week your child also books time with Swarit or a mentor he trains, and fixes whatever is stuck.

	SUN	MON	TUE	WED	THU	FRI	SAT
Live class 60 to 90 minutes	Live						
Weekly tasks 1 to 4 hours	At your child's own pace						
Mentor 1:1 30 minutes	Any day you choose						
Class group all week	Share progress, ask questions, help each other						

Recorded

Missed a Sunday? Watch it back.

Yours to keep

Code, notes and recordings stay with you.

The right level

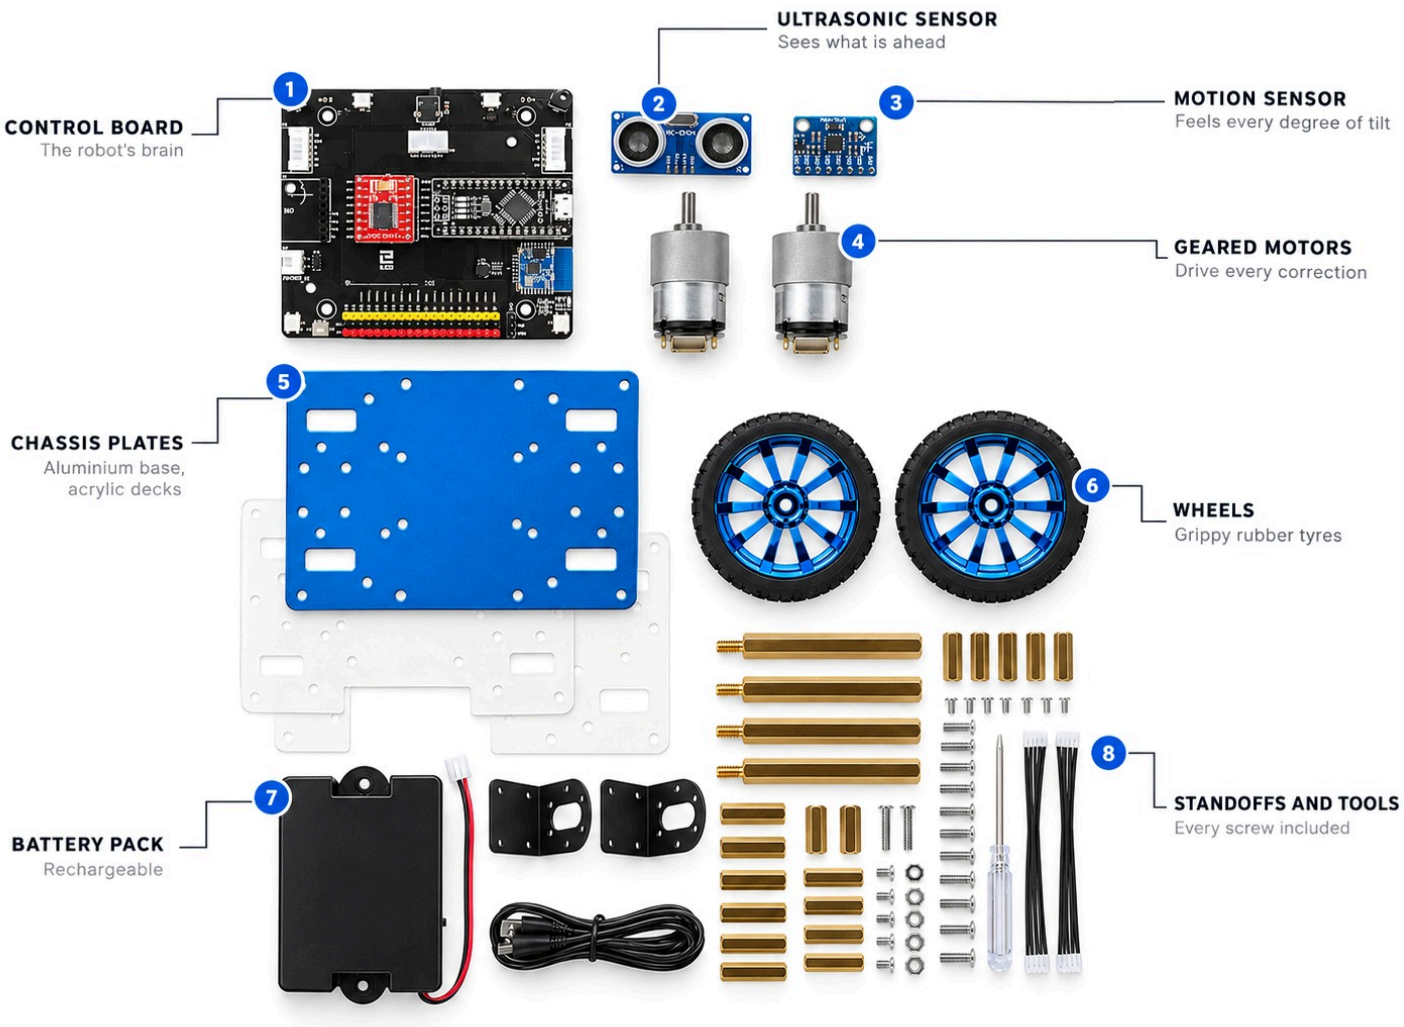

The entry test places every child well.

Certified

A Sterling certificate at the end.

The kit

Delivered before the build class.
Your child keeps the robot.

1. **Control board** the brain
2. **Ultrasonic** sees ahead
3. **Motion sensor** feels tilt
4. **Geared motors** drive it
5. **Chassis plates**
6. **Wheels**
7. **Battery pack** rechargeable
8. **Standoffs and tools**

Your mentor

Swarit Bhardwaj. Founder and lead mentor.

He teaches the way engineers actually work, so your child learns to think, not to memorise.

RESEARCH
Former robotics researcher, IIT Bombay

INDUSTRY
Autonomous vehicles, Swaayatt Robots

COMPETITION
Gold medalist, IndiaSkills Mechatronics

UNIVERSITY
Gold medalist, Mechatronics Engineering

POSTGRADUATE
Postgraduate studies, LaunchPilot Singapore

"Build it, break it, find out why, fix it. That is how I learned to engineer, and it is exactly how I teach."

100+	1,000+	3
Students taught	Hours of teaching	Years, the US and India

PROVEN AT

Cohorts

Two ways to start. Pick the dates that suit your family.

LIMITED SEATS ONLY

Founding cohort

15 Nov

Sunday 15 November 2026

A small class, so more questions get answered live.

Enrolment closes	**1 November**
Balance due, kit ships	**8 November**
Live class	**Every Sunday**
Demo day	**31 January 2027**

FULL CLASS

Winter cohort

10 Jan

Sunday 10 January 2027

Starts after the winter holidays and runs straight through to March.

Enrolment closes	**20 December**
Balance due, kit ships	**3 January**
Live class	**Every Sunday**
Demo day	**28 March 2027**

THE SAME IN BOTH

Robot kit
Delivered

12 Sundays
Same lessons

Weekly 1:1
30 minutes

$600
All included

Seats are limited in both cohorts. **Book the free entry test ›**

Admission

Free test first. Then $600 in two parts.

1 · ENTRY TEST

Free

A 10-minute video call.

Book the test ›

›

2 · RESERVE

$150

Once admitted. Counts toward the $600.

›

3 · BALANCE

$450

A week before class one. Kit ships.

You pay nothing until your child is admitted. Pay securely online.

TOTAL

$600

About $50 a week

- Robot kit, delivered
- Weekly 1:1 mentor
- Demo day
- 12 live classes
- All recordings
- Certificate

IF PLANS CHANGE

Before the deadline	**Full refund**
Before kits ship	**$75 back**
After kits ship	**No refund**

REFER A FAMILY

$50 + $50

Both of you get $50 off once their child is admitted.

FOUNDING COHORT

Enrolment closes 1 Nov

WINTER COHORT

Enrolment closes 20 Dec

Questions

The ones parents ask first.

Does my child need experience?

Not required. Some coding or Arduino experience helps.

What is the entry test?

Free. A 10-minute video call with Swarit. It checks thinking, not prior robotics.

How much time each week?

Up to 90 minutes live, 1 to 4 hours of tasks, and a 30-minute one-on-one.

What time are the classes?

Every Sunday, at a time confirmed before class one. Every class is recorded.

What if we change our mind?

Full refund before your cohort's deadline, $75 back until kits ship, no refund after.

What if my child gets stuck?

They bring it to their weekly one-on-one, or ask the class group any day.

Do we need to buy anything?

Only a laptop. The robot kit is included.

Will this help with college?

It gives your child a real engineering project to show in applications.

ONE MESSAGE TO BEGIN

Two start dates. Limited seats. Book the free entry test today.
